

TED LING

Ted is the eldest among the «Stone Age Teenies»; he has thus almost come of age. He testifies to having evolved from the dinosaur age virtually «without a problem», as Ted actually hails from «Northern Stonehenge», also known by the name of «London». But he has lived for a great many years in a cosy cave at the entrance to the Tamina Gorge. Ted looks after the keyboards, which he transforms into, say, an organ or a piano with ever amazing light-fingeredness. Should he get stuck in a lift he'd most rather be together with a fellow keyboard virtuoso: Herbie Hancock.
